## **Introduction Statement:**

My names are Thomas Joseph Ngunyi Mithamo. I am an undergraduate Software Engineering student at Zetech University Ruiru campus.

I am applying for a junior developer role at your company,i have around four years experience in software development for which I spent most of the time researching,learning,adapting,experimenting and working on both personal projects and contracted freelance jobs both local and online.

## **Education:**

My education is modeled around the outgoing 8-4-4 system,i started out at Jema Academy then transferred to St Benedict boys primary school until I completed my primary education then I progressed to Baricho Boys High school where I joined and completed my high school education then later I enrolled to Zetech university.

A brief education summary:

2002 – 2008 Jema primary school.  
2008 – 2013 St Benedict boys primary school,  
2013 – 2018 Baricho High School  
2019-current Zetech University,

## **Fields that am knowledgeable in:**

In the course of four years I have gained knowledge and grown in various technology and software development fields and I have become knowledgeable with:

- .Full stack Web Development
- .Android Development both Hybrid & Native
- .Data structure and algorithms
- .Object Oriented Programming
- .System Analysis and Design
- .Object Oriented System Analysis and Design
- .Distributed Systems
- .Cisco Networking
- .Web3(still learning )
- .Operating systems(I use Ubuntu Linux and windows 10);

## **Employment**

I previously worked as a intern at Glitex solutions limited for six months but mostly I have worked independently on personal projects and freelance jobs both local and online.

## **Skills**

My skill set are as illustrated below:

Web development : Front-end(React js ,next js, HTML ,CSS),  
Back-end(express js , Node js ).

Mobile development: React Native,Familiar with Java,flutter and Kotlin  
but not yet proficient with them .

Database: SQL( PostgreSQL ,MySQL ,SQL lite) ,  
NOSQL (Mongo db).

Operating systems : windows , Linux(Ubuntu 22.04 {Current} ,pop  
os ,parrot sec os ,kali Linux, manjaro Linux).

Web 3: Am in the process of learning solidity.

Design : Figma , Mockitt ,ink-scape ,krita and GNU image manipulator.

## **Hobbies and interests**

Am not much of a hobbies guy but football has a special spot in my heart am actually a Chelsea fan (its not relevant) but am more inclined towards interests .My interests include: reading philosophy books and other mindful books , am a pretty good gamer , fascinated with learning game development ,researching artificial intelligence to further understand the exciting leap towards the future , Studying Cyber based system vulnerabilities , learning about web3.
